

# ● Integrated Medication Workflows for EHR and HIT Vendors

**Cut through the complexity of medication management to meet customer demands.**

To stay competitive, EHR and HIT organizations need to provide regulatory-compliant technology and frictionless medication management for their customers. DrFirst delivers solutions that optimize the medication journey from prescribing to adherence. Partner with us to remove complexity with tailored clinical workflows that ease provider burden and stay ahead of regulatory requirements.

## Inform Clinical Decisions With Comprehensive Prescribing Tools

Give your customers the clinical information they need directly in their EHR workflows, including complete medication history at the point of care.

- **A single, seamless workflow:** Provide access to 12 months of patient data from the most complete medication history data feed for more informed decision-making during the prescribing process.
- **Time-saving solutions:** Collaborate with us to tailor workflows and streamline processes such as prior authorization and patient benefit checks.
- **A proven, certified process:** Integrate our solutions into your system through clinical APIs, so your customers get the benefit of our technology directly in their EHR system.
- **More value:** Explore new revenue streams and retain and grow your customer base by expanding the power of your system.

## Drive Adherence With Provider and Patient-Facing Technology

Empower clinicians with automated solutions to engage with patients and help them start and stay on therapy.

- **Engage patients:** Improve health outcomes with features like reminders and prescription renewal notifications to mobile devices, extending the doctor-patient relationship beyond the exam room.
- **Manage population health:** Uncover trends and patterns to inform care management programs for high-risk groups of patients.
- **Streamline prior authorization:** Reduce staff burden with automation to ensure that patients have access to the specialty medications they need more quickly.

## Optimize Your Operations With a Strategic Partnership

We work with you to reduce the burden on your team and support customer retention with award-winning technology that improves patient care.

- **Extensive partner program:** Join over 270 EHR and HIT vendors benefiting from our solutions and learn from our network of partners.
- **Innovative and compliant solutions:** Leverage 25 years of continuous innovation to keep your customers ahead of regulatory changes.
- **25 years of expertise:** Tap into our robust history of integration, clinical, and regulatory knowledge to optimize your system and enhance experiences for your customers.

Let us do the heavy lifting to optimize prescribing and adherence workflows for your customers, so you can focus on addressing market demands, discovering new revenue streams, and maintaining your competitive edge.
