

# Streamline Med Rec, Improve Med Adherence, and Reduce Readmissions With Your MEDITECH Expanse EHR

Did you know that DrFirst offers additional medication management features that support the entire patient journey? Clinically actionable intelligence from EMS to discharge and beyond.

## The Patient Care Journey

### EMS

MedHx Backline

When EMS teams arrive on the scene, Backline with MedHx provides mobile access to patients' individual medication history with a simple driver's license scan. First responders can share that information with the ED via a secure messaging platform to streamline communications and save lives.

### Prescribing Decision

myBenefitCheck ePA

myBenefitCheck provides real-time price transparency information with up to 46% more prescription benefits coverage for your patients. ePA makes it easy to complete prior authorizations quickly and within your e-prescribing workflow.

### ED Admission

MedHx SmartSuite

With AI-enabled medication history, emergency department teams can readily obtain and import the most complete medication history data available, reducing the errors that come from manual entry by up to 80%.

### Discharge

MedHx myBenefitCheck

Discussing the patient's medication therapy, benefit coverage, and prescription pricing ensures that they will understand and adhere to their treatment plan once they return home.

### Transitions of Care

Backline

Backline helps providers achieve better care coordination, better health outcomes, and better transitions of care with secure chat and texting.

### Text Reminders

RxInform

Receiving a secure notification when a patient's doctor sends a prescription to the pharmacy, educational material, and pricing improves first-fill rates and patient outcomes.
